I'm a 25-year-old engineering student from Muonio, currently in my 4th year of studying information and communication technologies at OAMK. I'm a fast learner who quickly adapts to new workflows and frameworks. My active studies and years of hands-on experience have given me a strong foundation to tackle diverse challenges. I'm particularly passionate about projects that bridge the gap between the digital and the physical, such as RF systems.

Skills

- [C#](#), [Java](#), [Linux](#), [Arduino](#), [node.js](#), [SvelteKit](#), [Godot Mono](#) • Proficient
